

Each talk lasts for about 90 minutes but can be adapted to different lengths if required.

They are presented by 2 Leitz slide projectors using dissolve equipment to prevent blackouts between slide changes. The projectors are operated by wireless remote control.

A wireless PA system and an 8 ft by 8 ft framed screen are available for use in halls or large rooms if required.

ON THE TEXAS TRAIL

Hooded Oriole, Vermilion Flycatcher, Summer Tanager, Painted Bunting, Green Jay, Pyrrhuloxia, Curved-billed & Long-billed Thrasher, Great Kiskadee, Harris's Hawk, Crested Caracara and Chachalaca are just some of the 130 colourful and spectacular species shown.

FLYDRIVE THE USA

More close-ups of colourful North American birds but this time from Florida to California and other Pacific States. Birds from the Everglades, Californian deserts, Yosemite National Park and more, right up to the Sierra Nevada Mountains are included.

MISCELLANY OF BIRDS

A look at a wide variety of birds from different habitats from all parts of Britain. Stone Curlew, Little Ringed Plover, Barn & Little Owls, Green Woodpecker and many others.

BRITISH SEABIRDS

There are about 24 species of seabirds breeding in Britain and nearly all of them are covered ranging from Cormorant, Shag and Gannet to gulls, skuas, both Guillemots, Razorbill, Puffin, Fulmar and most of the terns.

BREEDING BIRDS OF SHETLAND

Part 1

Close-up views of the breeding activities of most of the terrestrial species, including waders and a couple of sea-birds.

BREEDING BIRDS OF SHETLAND

Part 2

This is an entirely separate talk from **Part 1** with the remaining seabirds and other species associated with the sea.
